Preface to
The Program to Learn Hypnosis by NSP

In nearly 4 decades since the Chongs were taught to do Hypnotism, its pedagogy has NOT changed. The student is taught to do it by his NL[1] and, upon completion he takes the hypnotism induction scripts away with him and he is deemed competent to do Hypnotism. This pedagogy **produces a robot**, not a competent, versatile and facile Hypnotist.

Additionally the problem is that NL, the Aristotelian language system of Cause and Effect, **A,** is the only language system to do the Hypnotism. NSP recognizes that it is a very powerful language for Hypnotism. However it is **NOT** the only one; and there are better. They include:

**Non-Aristotelian Language system of
Relativity and Relatedness, $\tilde{A}$**

Modified Meta Model, 3M

Informal Logic, IL

No-Y-ian Model of Language, ~Y Ad[2].

In life, if you wish to take up a given study, there are certain **critical requisites** that are taken that you already have. Thus, if you wish to study accountancy, **at the very least** you have to know how to add and subtract.

To be a student of this NSP program in learning Hypnotism, you have to have a mastery over the above 4 languages, to wit, **A**, $\tilde{A}$, 3M, IL and ~Y Ad.

How do you acquire these language systems?

You do so by completing the basic NSP seminars – the Freedom, De-Imprinting and the Power.

---

[1] **NL** is the abbreviation that the study of Linguistics designates the normal language we think by and use in our normal life for discourse, conversation, debate and arguments.

[2] **Ad** was the abbreviation created by NLP to stand for the word, "language." Language is deemed to be the sum of **A**uditory **d**igits, to wit, the words spoken or written.
